

SPONSORS

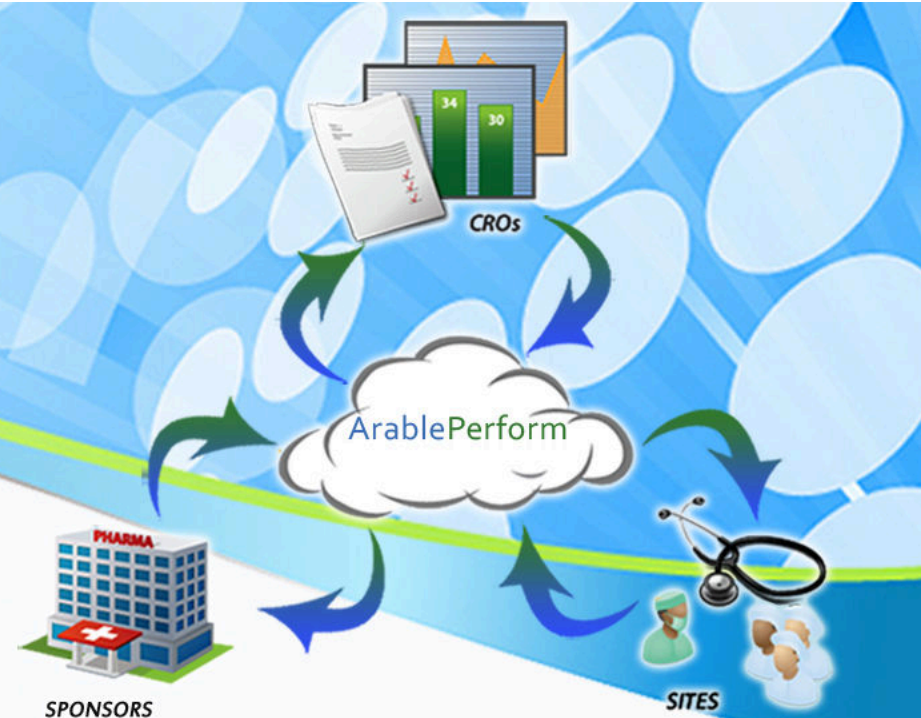

We understand the complexities of contemporary CTMS and the additional work required from clinical operations. ArablePerform is designed to free critical staff from redundant work and provide senior management with the information they need.

ArablePerform helps you automate the clinical operations process by allowing the collaboration and communication of clinical operations and site performers.

ArablePerform brings transparency to clinical trials. Direct access to current trial data gives Sponsor and CRO management the information needed to administer resources more effectively.

Our system provides CTMS/EDC functionality integrated with:

- Central Contact Management
- Trial and Site Document Control Distribution
- Encapsulated communication for Issues/Query management
- At your trial's conclusion, all source data, documentation and communications are centrally available for a simplified regulatory filing.

EASE OF USE

ArablePerform is intuitive and user-friendly for everyone from senior management to clinical staff enabling better communication and efficient work practices.

SECURE

Our software and hosting providers bring industry leading security and reliability to your clinical trials environment.

COST

ArablePerform's product licenses should compare favorably with other CTMS systems and with considerably lower implementation costs.

SCALABLE

Whether managing a few sites or many around the world with single or multiple CROs, ArablePerform can adapt to your changing requirements.

INDUSTRY KNOWLEDGE

Our system facilitates an efficient clinical operations process designed by clinical trial professionals for use by their peers.
